Some of our products

Technohaven Enterprise Resource Management System

By organizing information and automating business processes across the entire enterprise, TERMS builds flexibility and control into every facet of your business environment and increases the quality and visibility of the information you need to make more profitable decisions.

Technohaven Integrated Banking System

TIBS is a latest generation on-line core banking software that is designed to meet the challenging needs of the financial market place. With TIBS the clients of all branches collectively become the clients of the bank. The goal of the proposed solution is to enable the bank to offer modern banking services efficiently and operate MICR, ATM & POS devices and adopt all modern banking delivery channels.

Technohaven Point of Sale

Extremely flexible and user-friendly, the Technohaven Point Of Sale System is scalable and easily grows with your business. Designed to make your retail network quick and easy, whether you have a single station or you have multiple stores, affiliates or branches to connect, Technohaven's user-friendly TPOS software technology stays ahead of industry demands.

Technohaven Billing System

TBS couples a clean and easy-to-use interface with a rich set of features designed for utility companies that optimizes their billing, accounting and customer relations operations in a seamless manner. Its features include digitized searchable notes and reminder list, daily planner, customer message center, sales and collection analysis and revenue/growth projections.

Technohaven Leasing & Investment System

TeLIS is an end-to-end enterprise class business solution for the financial institutions whose primary focus is leasing business. TeLIS includes accounting, deposit, payroll, operating & financial leasing, documentary credit, term finance, investment tracking & MIS.

Technohaven Attendance & Payroll System

TAPS helps you manage your workforce easily, efficiently and effectively when it comes to time & attendance, human resources and payroll solutions. TAPS simplifies your HR administration by managing your workforce, increasing productivity and reducing payroll-processing cost.

Technohaven Import Export General Manifest

TEIGEM generates automatic Import Export General Manifest. This is customized software for any type of shipping company who are involved in import-export related business which includes global settings, vessel information, port information, bank information, customer information, shipper information.

Technohaven Commercial Management System

TCMS is an integrated solution for industrial or corporate houses who need razor-sharp focus on commercial and banking operations. The software provides a comprehensive business solution on foreign procurement, clearing & forwarding, L/C management, banking & finance, loans & leases and a central MIS system that provides round the clock information & reports.

Technohaven Electronic Work-flow System

E-flow automates any business process, in whole or part, during which documents, information or tasks are passed from one participant to another for action, according to a set of procedural rules. E-flow results in speeding up and/or elimination of many procedural steps which improves efficiency & customer service.
